National FFA Written Exam KEY 2022

Book: Small Animal Care and Management

- 1. When bringing a ferret home the owner should
 - a. Start training immediately
 - b. Give the ferret time to adjust to its new environment
 - c. Talk loudly to the ferret so it learns the owner's voice
 - d. Lock them in a room away from the rest of the household

p. 352

- 2. Which breed of cat has a complete lack of tail due to breed characteristics/standards?
 - a. Manx
 - b. Ocicat
 - c. Bombay
 - d. Abyssinian

p. 210

- 3. Which species nearly went extinct in the wild due to poachers trapping them for their pelts?
 - a. Ferrets
 - b. Rabbits
 - c. Chinchillas
 - d. Guinea Pigs

p. 332

- 4. All species of snakes fall into the family Boidae except:
 - a. Reticulated python
 - b. Anaconda
 - c. Boa constrictor
 - d. Corn snake

p. 396

- 5. Birds have four types of feathers. The purpose of the down feathers is
 - a. Insulation
 - b. Assist with flight
 - c. Sensory
 - d. Provide the bird's color

p. 441

- 6. In fish, where is the caudal fin located?
 - a. On the back
 - b. On the side
 - c. On the belly
 - d. On the tail

p. 488

b. Meat c. Research d. Hunting rodents p. 242 9. The most abundant species of the hamsters are a. Golden hamsters b. Dwarf hamsters c. European hamsters d. Romanian hamsters p. 278 10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AWMA c. AALAS d. AWMA p. 255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen d. Pepsin		a.	Pets	
d. Hunting rodents p. 242 9. The most abundant species of the hamsters are a. Golden hamsters b. Dwarf hamsters c. European hamsters d. Romanian hamsters p. 278 10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		b.	Meat	
p. 242 9. The most abundant species of the hamsters are a. Golden hamsters b. Dwarf hamsters c. European hamsters d. Romanian hamsters p. 278 10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMM b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		c.	Research	
p. 242 9. The most abundant species of the hamsters are a. Golden hamsters b. Dwarf hamsters c. European hamsters d. Romanian hamsters p. 278 10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AVMA p. 255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		d.	Hunting rodents	
a. Golden hamsters b. Dwarf hamsters c. European hamsters d. Romanian hamsters p. 278 10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWMA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen				
a. Golden hamsters b. Dwarf hamsters c. European hamsters d. Romanian hamsters p. 278 10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		b.	Dwarf hamsters	
d. Romanian hamsters p. 278 10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		c.	European hamsters	
10. Which species communicates by standing upright and pounding their rear feet? a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen				
 a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen 			p. 278	
 a. Hamsters b. Guinea pigs c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen 	1	.0. Which	species communicates by standing upright and pounding their rear feet?	
c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen				
c. Gerbils d. Ferrets p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		b.	Guinea pigs	
p. 293 Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		c.	Gerbils	
Book: Veterinary Assisting Fundamentals and applications 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen		d.	Ferrets	
 11. Which organization/association was developed for the exchange of information and humane care of laboratory animals used in research? a. AMA b. AVMA c. AALAS d. AWA p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen 			p. 293	
p.255 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen	1	care of a. b. c.	laboratory animals used in research? AMA AVMA AALAS	
 12. Blood is composed of cells and plasma. Plasma is made up of all of the following proteins except: a. Albumin b. Globulin c. Fibrinogen 		d.		
a. Albumin b. Globulin c. Fibrinogen			p.255	
b. Globulin c. Fibrinogen	1			
c. Fibrinogen				
a. Pepsin				
		d.	Pepsin	

7. The typical average lifespan of a hedgehog is

8. Rabbits are used for all of the following except:

a. 1 yearb. 5 yearsc. 10 yearsd. 30 yearsp. 544

```
p.415
```

13. A female with a uterine infection where the uterus fills with purulent material (aka pus) is known as

a. Pyometra

- b. Pyoderma
- c. Hyperplasia
- d. Brucellosis

p.455

14. Encephalitis is commonly called

- a. Blind staggers
- b. Sleeping sickness
- c. Cancer
- d. Bang's disease

p.509

15. Listening to the heart and lungs through a stethoscope is known as

- a. Auscultation
- b. Palpation
- c. Arrythmia
- d. Observation

p.624

16. All of the following are included in the anatomy of a dog's toenail except

- a. Nailbed
- b. Quick
- c. Keratin
- d. Epidermis

p.679

17. Indicator strips/tape on/in a surgical pack are activated when

- a. Proper temperature has been reached
- b. Proper pressure has been reached
- c. Proper time has been reached
- d. All of the above

p. 791

18. A cat with extra toes is known as

- a. Polydactyl
- b. Teradactyl
- c. Polyphalanges
- d. Teraphalanges

p.123

Commented [SKW1]: Added purulent material

a. Meat b. Fiber c. Riding d. Packing p.239 20. All of the following are types of restraint used on a horse except a. Pinching b. Hobbles c. Twitching d. Nose tongs p.288 21. The peripheral nervous system consists of the sensory somatic system and a. Plexus system b. Accessory system c. Automatic system d. Autonomic system p. 148 22. Blood returns to the heart through the large vessel called the a. Vena cava b. Ventricle c. Coronary artery d. Pulmonary vein p.59 23tissue is also referred to as fat. a. Corium b. Adipose c. Striated		are bred for all of the following except

d. Preventatives p.181

a. Blood pressure

25. The pituitary gland releases hormones that affect all of the following except

d.	Uterus
	p.163
26. All of th	e following are part of the six major components of animal diets except
a.	Water
b.	Carbohydrates
c.	Probiotics
d.	Vitamins
	p. 190
27. Bacteria	present in four shapes. Which of the following is rod shaped?
a.	Staphylocci
b.	Streptococci
c.	Bacilli
d.	Spirochetes
	p.222
28. Rumina	nts are said to have four stomachs. All of the following are part of the ruminant's
stomach	nexcept
a.	Abomasum
b.	Cecum
C.	Omasum
d.	Reticulum
	p. 114
29. The cro	wn of a cat's tooth is covered in, the hardest substance in the body.
a.	Cementum
b.	Dentin
c.	Pulp
d.	Enamel
	p. 103
30. Alveoli,	where gas exchange takes place in the lungs, are located at the end of the
a.	Trachea
b.	Bronchus
c.	Bronchiole
d.	Cartilage ring
	p.76
Book: Vet Med	Term
31. The pelt	of an animal refers to the

b. Kidneysc. Thyroid

Commented [SKW3]: Changed from animals to animal

d.	None of the above p.207	
22		
	mation of the kidney is	
	Nephrosis	
	Nephroptosis	
	Nephritis	
d.	Nephropathy	
	p. 151	
	nee" in people is known as what in horses?	
a.	Hock joint	
b.	Pastern joint	
c.	Coffin joint	
d.	Stifle joint	
	p. 85	
34. The su	irgical puncture to remove fluid from the abdomen is known as	
	Abdominocentesis	
b.	Abomasopexy	
	Anastomosis	
d.	Enterostomy	
	p.129	
	normal levels of oxygen in an animal is known as	
	Infarct	
	Нурохіа	
	Hypocapnia	Commented [SKW4]: Changed Ischemia to Hyocapnia
d.	Thrombus	
	p. 176	
	eat cycle in a female is known as	
	Estrus cycle	
	Estrous cycle	
	Lactogenic cycle	
d.	Follicular cycle	
	p. 258
